SUMMARY

Technical marketer with a software-development background who owns the end-to-end marketing workflow at a B2B AI consultancy: paid lead generation on Meta (with a LinkedIn test), lead qualification and sales handover, analytics in SQL and Metabase, SEO, content and video, and AI-assisted reporting and automation. Connects ad spend to CRM pipeline and revenue. Targeting Marketing Operations, Growth and Analytics roles.

EXPERIENCE

Technical Marketing Officer — THCloud.AI Dec 2025 – Present

B2B AI consulting and implementation company (Tonghua Holding PCL group), Thailand

Owns the end-to-end marketing workflow: paid media, lead qualification and sales handover, analytics and reporting, content and video, automation and website delivery. Reports to the manager and CTO; works with BD, BI and dev teams.

- Run paid lead-generation ads, mainly on Meta (Facebook and Instagram, about ฿18K per month), optimizing for qualified leads (MQL/SQL) from funnel and CRM data rather than click or lead volume; a LinkedIn test (May–Jun 2026) produced MQLs. Audited Meta accounts; set up GA4 and pixel tracking.
- Set up lead-status tracking and the Sales–Marketing handover (BANT + Fit criteria, Lead Handover Sheet, CRM report); about 40% MQL-to-SQL conversion in 2026.
- Built the monthly marketing-to-revenue dashboard in Metabase for leadership (ad spend → MQL/SQL → ROAS/ROI → closed-won value and lost reasons) plus daily monitoring, using SQL and AI agents with MCP tools to pull ad data and audience insights.
- Authored the marketing planning and operations framework (plans, workflows, KPIs, templates, inter-team forms), reviewed by an external ISO consultant.
- Built a content agent that sends content ideas to a Discord bot for approval (daily, weekly or on demand) from a filtered, scraped feed; set up a posting system for LinkedIn, YouTube and TikTok (from Oct 2026).
- Consulted on a pre-launch social-scraping product (demand, data requirements) and built the data store behind it. Produce video end to end for content and ads, from concept and script to shoot, voiceover and publishing.
- Wrote the 3-month marketing and media plan (channels, organic/paid mix, content volume, KPIs) for a new overseas-partner product line with no brief; defined what to request from the partner, prepared test ads in advance; also wrote the video media strategy plan and creative brief for the graphics team; first qualified leads within days of launch.
- Design and build the official landing pages myself (AI-workshop; product page): UI, copy, countdown, lead forms into Google Sheets via Apps Script; BD supplies product details. PM lead on a client website (first version in about 10 man-days); project coordinator and business-solution consultant for two more clients; advise the dev team on scope and wrote a BRD.

Software Developer & Project Coordinator — Business Services Alliance Co., Ltd. (PTT Group) Aug 2023 – Jan 2025

- Developed, maintained and debugged GIS and land-survey systems for PTT's Land Department; designed the land and legal assets database; main administrator supporting users.
- Gathered requirements, wrote test cases, ran UAT with clients and tracked progress through delivery.

INTERNSHIPS

Creative Intern — Two Shot Studio Jun – Aug 2020

- Researched creative ideas for clients, planned shoots, drew storyboards and managed the project budget.

Second Assistant Director Intern — "My Engineer" production team, WeTV Sep – Nov 2020

- Produced daily call sheets and coordinated cast and crew schedules on set.

EDUCATION

B.Sc. Information and Communication Technology (Multimedia Systems, International Program) — Mahidol University
2016 – 2020

- Senior project "ARdastral": augmented-reality app combining GPS and GIS to show cadastral (land-survey) boundaries through the phone camera, with positioning error within 3 cm.

AWARDS AND CERTIFICATIONS

- Passed the semi-finals and received NSTDA funding for development — 22nd Thailand Computer Program Development Project Competition, 2019 (ARdastral)
- Business Analytic & Digital Performance Marketing Exam — SKILLKAMP × KBank & Partners
- UX/UI Certification — UXUI Studio (Unlock Skills)
- Business Innovation Course Online — Thammasat University × Skillane (TUXSA)
